

Fog of War — UI wireframes (low-fi)

Layout intent only — no styling. Read together with **UI-SPEC-EN.md** (what every element shows/does) and the visual-direction brief. Portrait 1080×1920. Solid boxes = static chrome, dashed cream boxes = dynamic content, rounded grey = tappable. **The multiplayer campaign is the main focus**: frames 3–9 are designed for 16 humans (solo vs bots reuses them unchanged); frames 13–16 are the multiplayer-specific screens.

 static  dynamic content  tappable  red/blue bar = enemy / own team accent

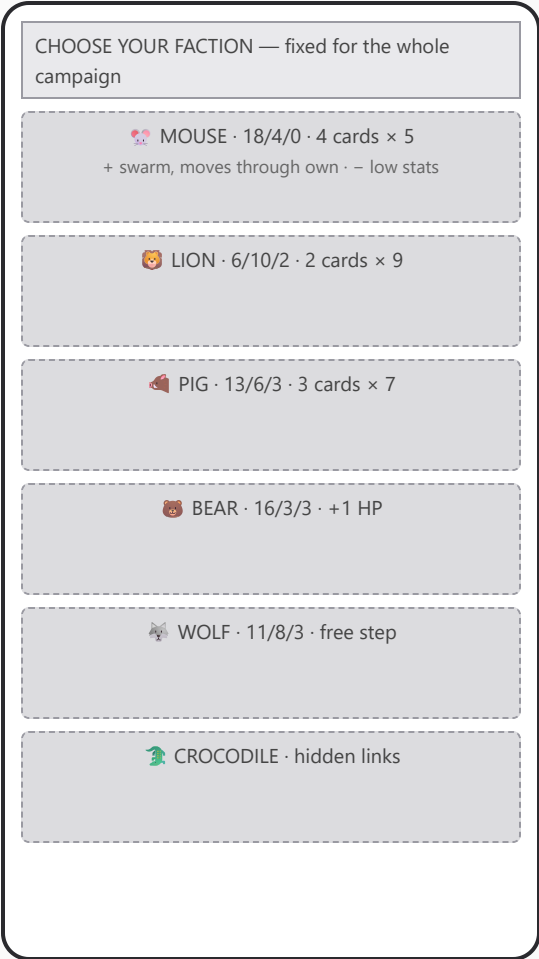

1 • Main menu

The storefront of the style ("field table"). Also: settings + help.

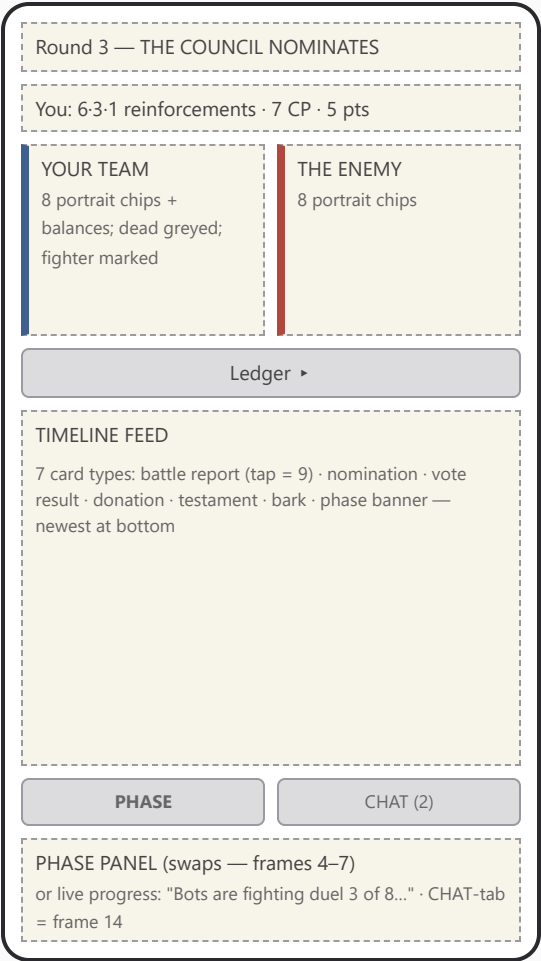

2 • Faction pick

Once per campaign, permanent. 6 cards: emblem, composition, cards×budget, pro/con.

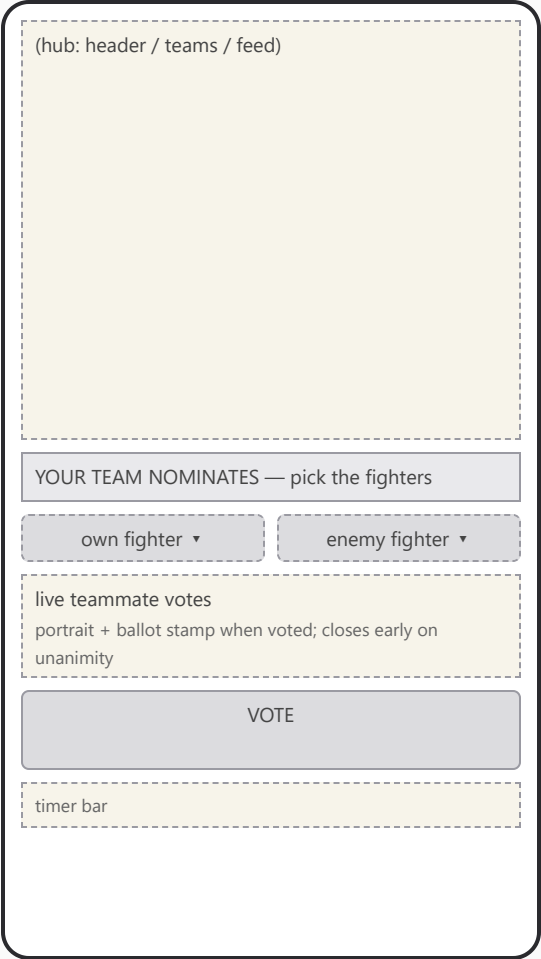

3 · Campaign hub

Home screen. Timeline feed of event cards is the heart; bottom panel swaps per phase (frames 4–7).

4 · Phase panel — Council

Panel variant inside frame 3. Round 1 is drawn by lot (no council).

5 · Phase panel — Donations

Caps are hard rules: max 10 pawns / 3 CP per recipient per round — show why something is blocked.

(hub)

DONATE — or keep everything

teammate ▾

soldiers -/+

cavalry -/+

cannons -/+

CP -/+

DONATE

DONE DONATING

6 · Phase panel — Testament

The drama moment (you just fell). Big timer; timeout burns everything. Recipients may be enemies.

(hub, muted/sepia — you are dead)

YOU HAVE FALLEN — bequeath up to half, max 2 recipients

⌚ BIG TIMER

recipient ▾ (any living player)

half = 4 soldiers · 1 cavalry · 3 CP

BEQUEATH HALF

BURN EVERYTHING

7 · Phase panel — Your duel

Gateway to the board. Stakes must be crystal clear.

(hub)

✕ YOUR DUEL: you vs Piet
Full team fielded; reinforcements you commit are spent for the campaign.

PLAY THE DUEL ON THE BOARD

8 · Ledger (roster)

Regiment book: sortable columns, your row highlighted, dead players below/greyed.

LEDGER (sort: pts / troops / CP / name / status)

▸ portrait · emblem · 6-3-1 · 7 · 5 ·

▸ YOU — highlighted row

▸ ...14 more rows...

BACK

9 · Match report

Opens from a feed card; also the post-duel screen. Win-method icons: 🏰 harbor / 💀 elimination / 🏆 tiebreak / 🏳️ resign.

NORA WINS — harbor, 6 cycles

Nora: -3 soldiers -1 cavalry · CP +8 · committed 2

Bruno: -9 soldiers -2 cannons · CP -10 · committed 5

WATCH REPLAY (later)

CLOSE

10 · Board — action phase

3D board + 2D HUD. Target markers need shape + color (color-blindness). "?" seal = hidden enemy stats, never zeros.

⌘ ACTION · cycle 2 · **your turn** · ⌚ 0:14

enemy harbor row

remove: pinned ghost order
(queued ≠ executed)

orange = line of fire

green = move (+cost)

stat chips ... / "?" seal

red = melee/charge

cannon: action-pot badge

your harbor row

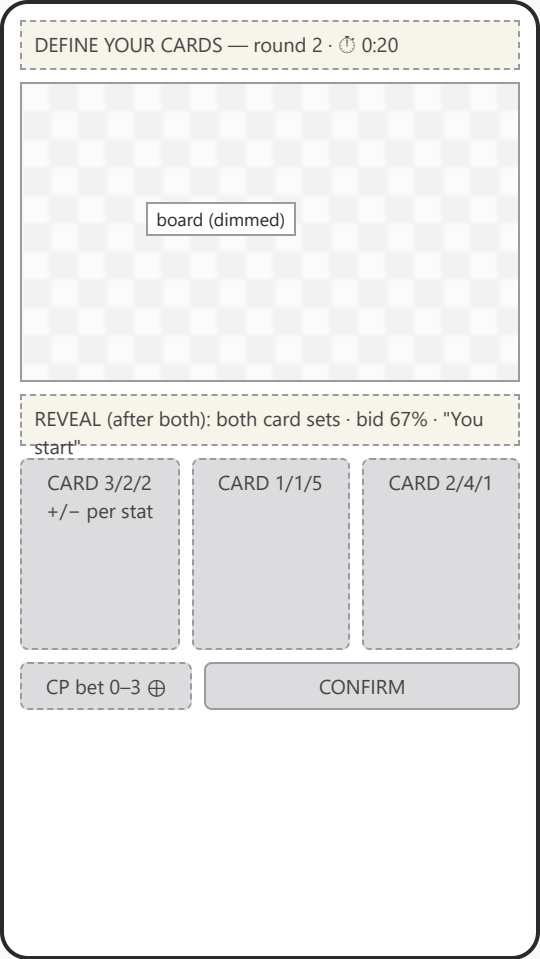

context
(skip/undo)

?

≡ resign

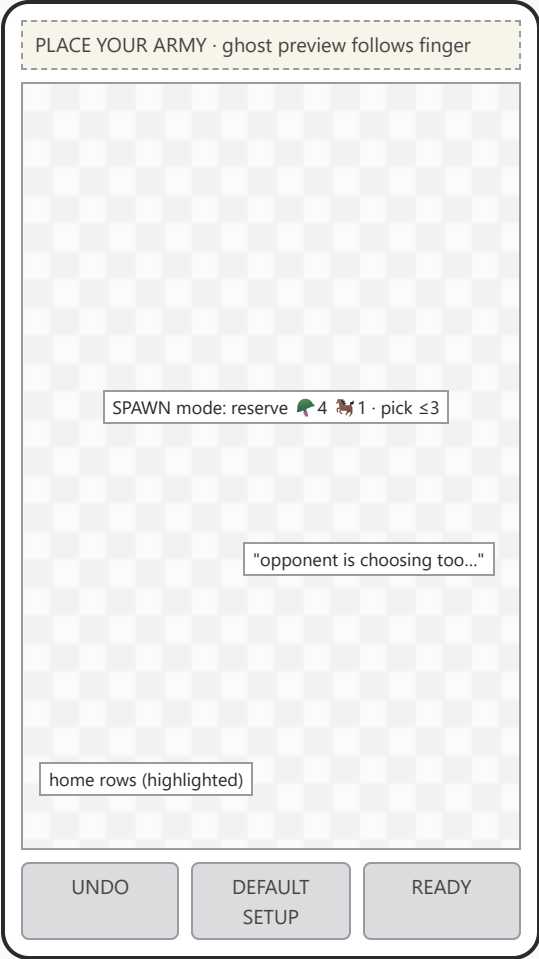

11 · Board — define & reveal

Blind simultaneous phase. Card fan per CARD-DESIGN-BRIEF; CP-bet stepper; reveal shows both sets + initiative bid.

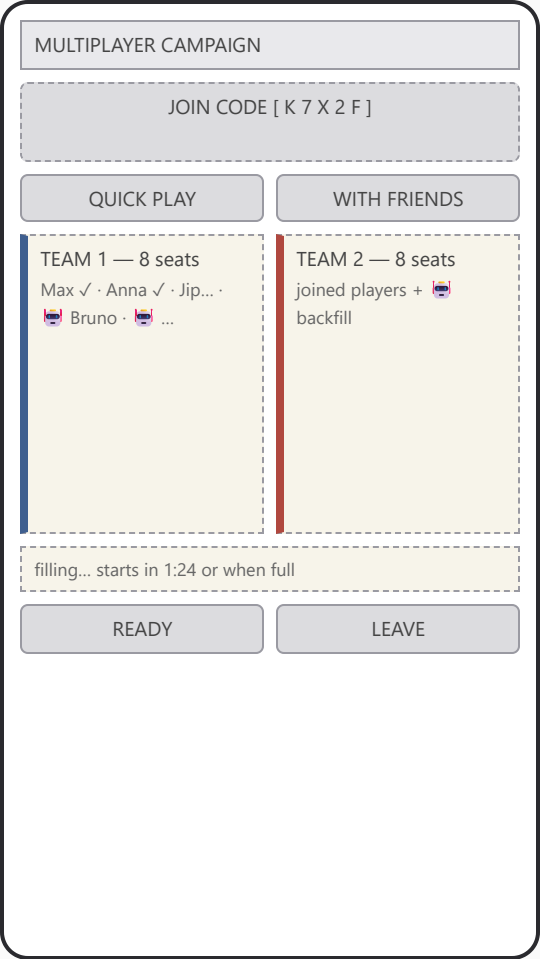

12 · Board — placement & spawn

Placement: free setup on two home rows. Spawn (campaign): up to 3 reinforcements on the back row, blind & simultaneous.

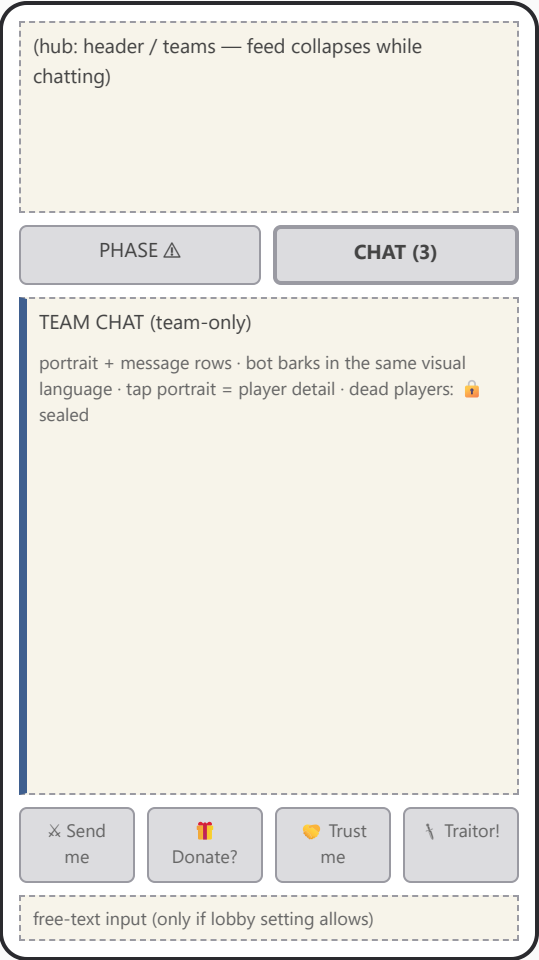

13 · Lobby (multiplayer)

Three entry paths; seats fill live; empty seats become bots — ALWAYS labeled 🤖 (trust rule).

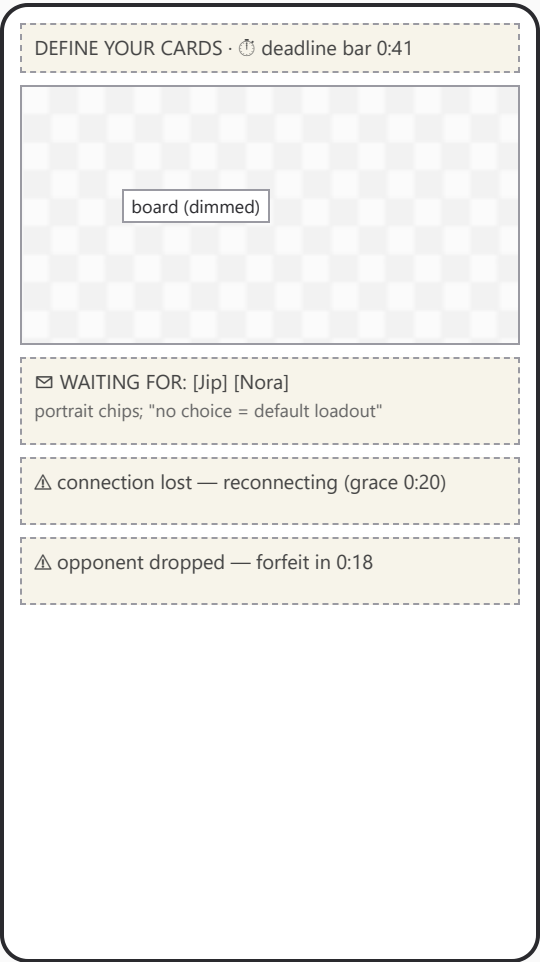

14 · Chat screen (tab next to the phase panel)

The hub's bottom zone has two tabs: PHASE ⇄ CHAT. Chat = full screen state at the phase panel's position; unread badge on the tab; Phase tab pulses while an action is required of you.

15 · Waiting & connection states

Every blind/simultaneous moment shows WHO we wait for + the server deadline + the consequence. Same pattern in duels (reconnect grace).

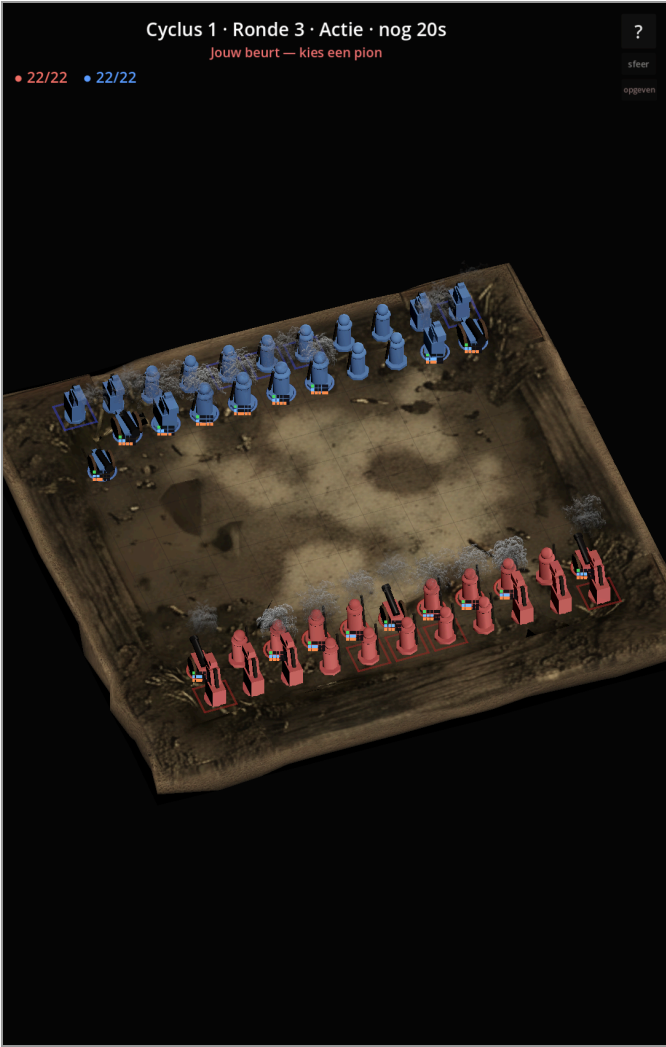

16 · Ghost mode (dead players)

Whole hub in muted/sepia; team secrets visibly sealed; public info stays. Ghosts must WANT to keep watching (drama is the product).

Appendix — screenshots of the current build

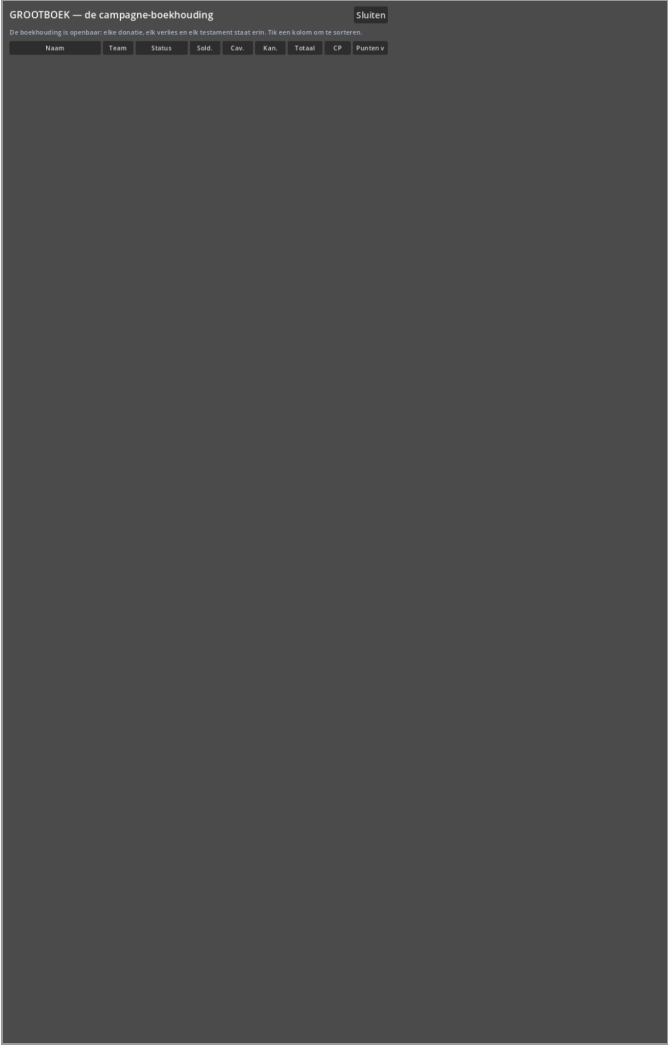

The game is playable today with programmer-UI: these show the real layouts and content density behind the wireframes. Everything visual is up for redesign — treat these as content reference, not style reference.

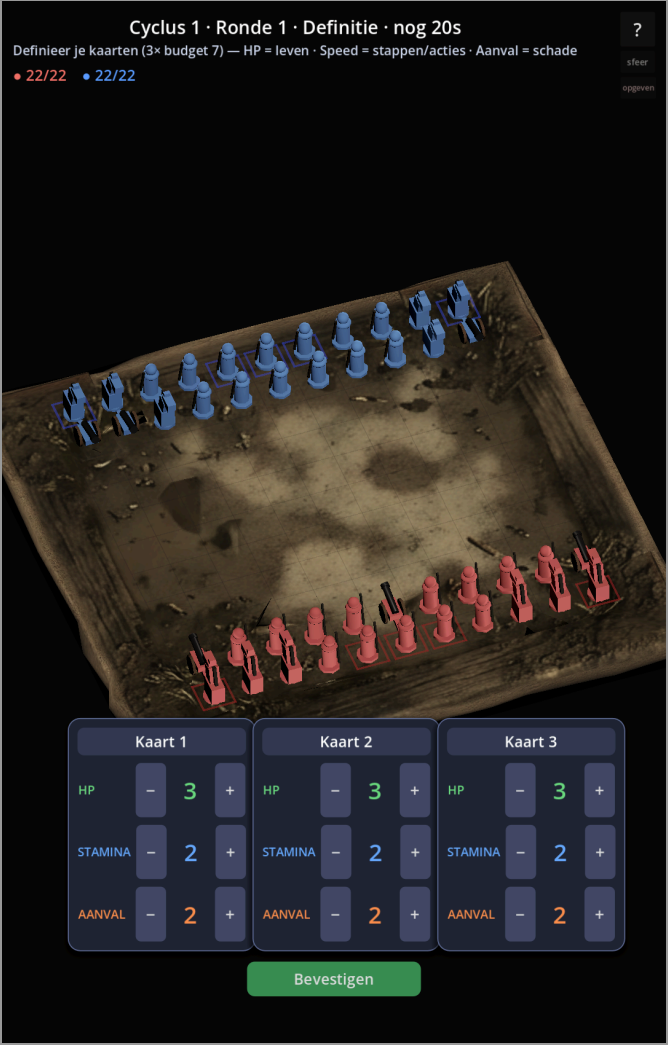

The board — action phase (cf. frame 10)

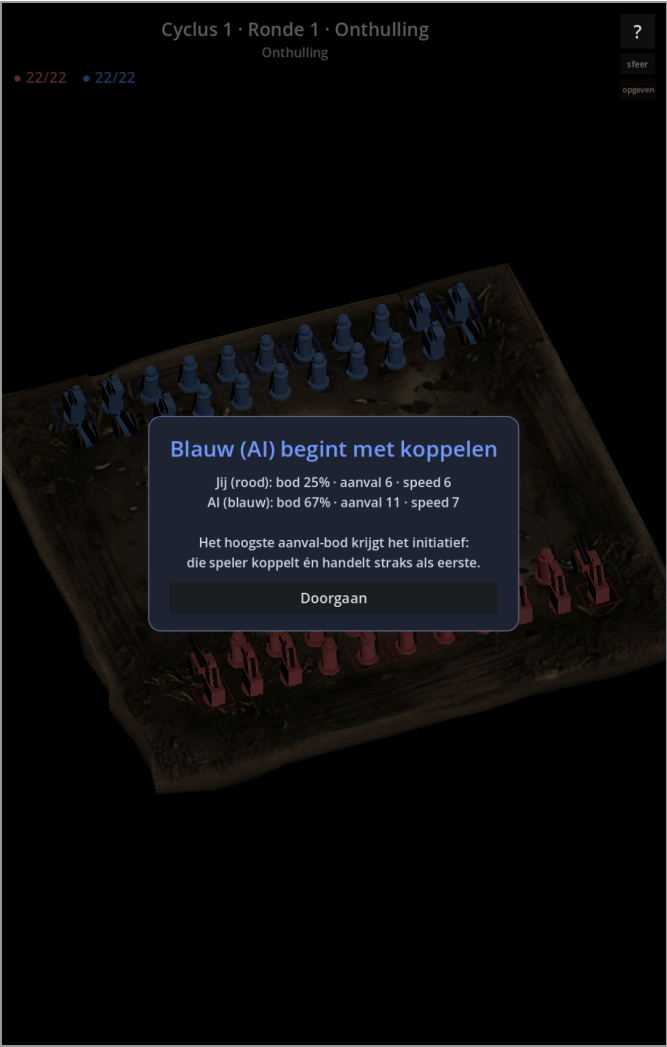

Campaign hub + timeline feed (cf. frame 3)

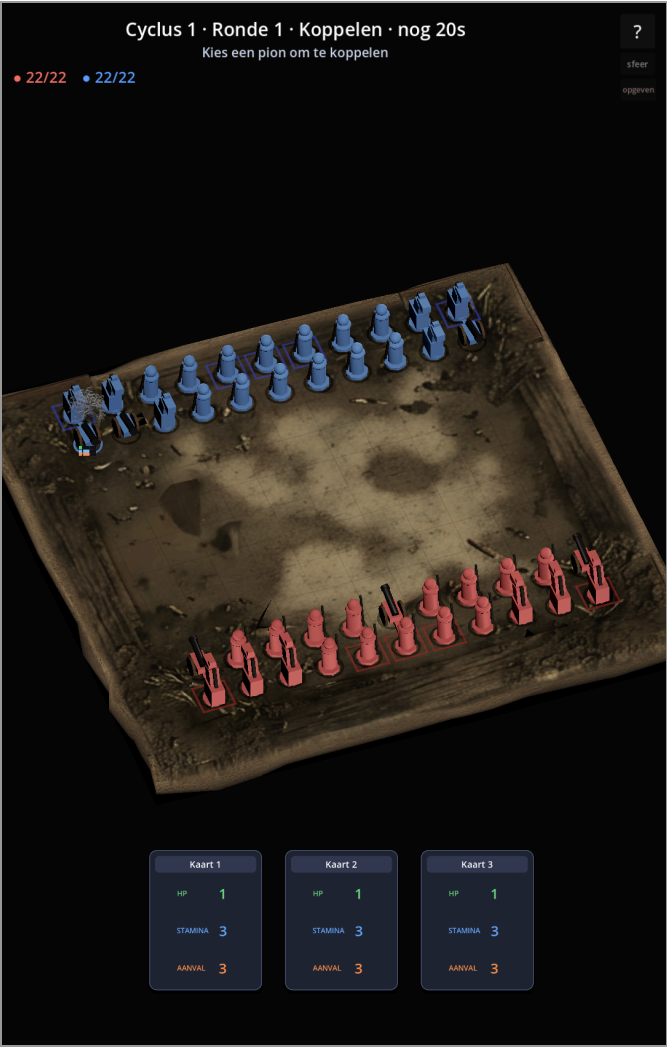

Ledger / roster (cf. frame 8)

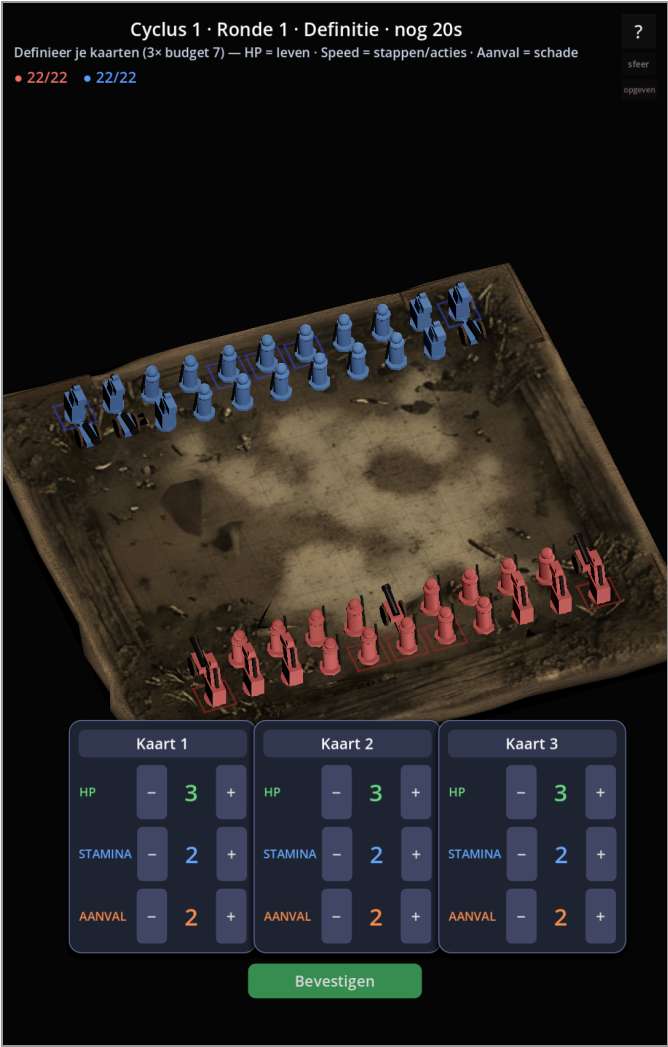

Define cards — card fan (cf. frame 11)

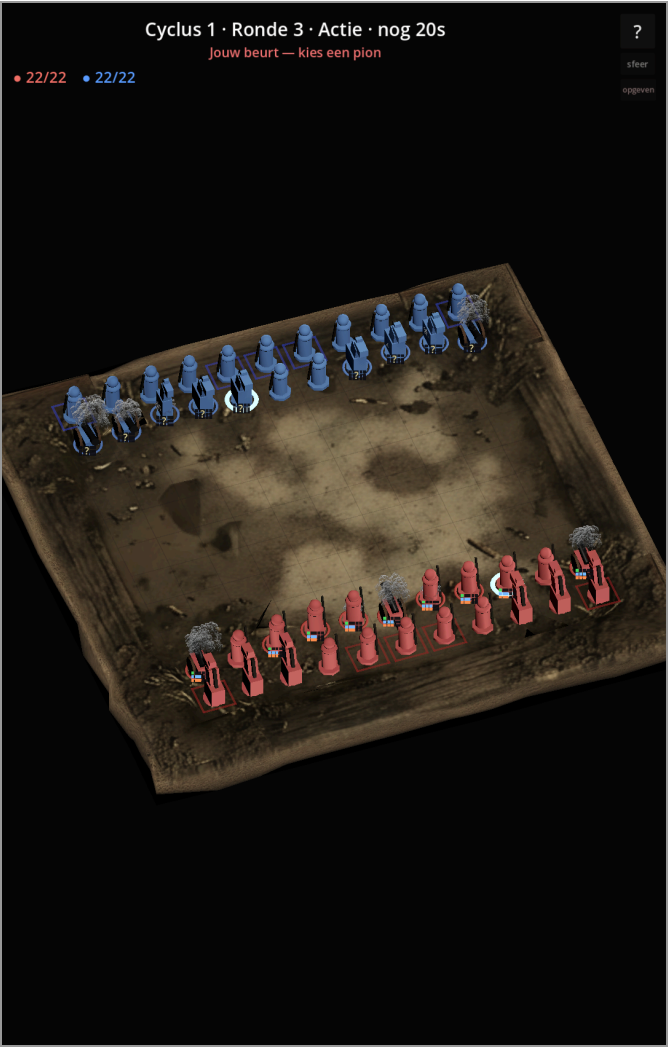

Reveal — both sets + initiative bid (cf. frame 11)

Linking cards to pawns

Free placement on home rows (cf. frame 12)

Hidden info — the "?" state (cf. frame 10)

Fog of War © Max Nieuwenhuijs — wireframes v2 (27 Jul 2026). The multiplayer campaign is the main focus; frames 3–9 exist functionally in the build (solo, programmer-UI), frames 13–16 are multiplayer-specific. To share as PDF: open in a browser → Print → Save as PDF.
